## Summary

Junior Java Backend Developer with a strong foundation in computer science and hands-on experience in building secure, scalable microservices using Spring Boot, Spring Cloud, Kafka, and REST APIs. Skilled in Docker, Kubernetes, and deploying applications on VPS. Adept at problem-solving, collaborating in agile teams, and delivering clean, maintainable code following SOLID principles.

## Technical Skills

**Backend**: Java 8, Spring Boot, Spring Framework (Core, MVC, Security, REST), Spring Data JPA, Hibernate, HQL, Microservices, Kafka, Eureka, Spring Cloud Gateway, JUnit, Mockito, Python, Flask
**Frontend**: Angular, HTML, CSS, JavaScript, TypeScript
**Databases**: MySQL, Oracle, PL/SQL
**DevOps & Tools**: Git, GitHub, Maven, Docker, Build-Packs, Google-Jib, Kubernetes, Helm, Linux, Bash, Postman, Swagger
**Concepts**: OOP, Design Patterns, Clean Code, SOLID, Algorithms, Data Structures

## Experience

- Full Stack Java-Angular Developer – IN-TECH
  Oct 2025 – Present
  - Designed and built robust **RESTful API services** using Spring Boot, Spring Data JPA, and Hibernate, applying JWT authentication and fine-grained role-based authorization to secure system resources.
  - Developed a reliable **file management module** for secure uploading, storing, and retrieving images and documents, incorporating validation, permission checks, and structured storage workflows.
  - Built and maintained **Angular components and modules** with full **English/Arabic localization**, ensuring a seamless and responsive interaction between the frontend and backend services.

- Java Back-End Developer – X-TECH
  June 2024 – Jan 2025
  - Implemented scalable **RESTful backend services** using Spring Boot, JPA, and Hibernate, enforcing strong security through JWT authentication and role-based access control.
  - Integrated a **Redis-based caching layer** to reduce database load and significantly improve response times for frequently accessed endpoints.
  - Developed **real-time communication features** using Spring WebSocket, enabling instant messaging, live updates, and notification delivery across the platform.
  - Built a secure **file handling system** for image and PDF uploads, backed by access restrictions, validation rules, and structured storage.
  - Containerized backend services with **Docker** and deployed them to VPS infrastructure, taking ownership of monitoring, debugging, and resolving production issues to ensure system stability.

## Projects

- E-Commerce Microservices

  Get Hands on some microservices tools and technologies like Spring Cloud Gateway, Eureka as discovery server, Spring config, Kafka for asynchronous communication between services, and more.

- Full-Stack Java-Angular Developer – Graduation Project (Hiring Process Management System)
  - Built backend services using Spring Boot, Spring Data JPA, and Spring Security for multi-role access control.
  - Integrated Google OAuth for social authentication.
  - Developed CRUD operations for users, job posts, and applications.
  - Implemented file upload/download functionality with secure storage.
  - Contributed to Angular frontend development and maintained existing pages.
  - Documented APIs using Swagger.

## Education

B.Sc. in Computers and Systems Engineering – Al-Azhar University, Cairo

Sept 2019 – July 2024 | Grade: Excellent with Honors

## Courses

Java Spring Track – ITI Tech-Leaps (4.5 months) | Nov 2022 – Mar 2023

## Honors & Awards

ECPC Qualifications Participant (2021, 2022, 2023) – Ranked 9th of 37 teams in last participation.

## Languages

**Arabic**: Native
**English**: Excellent reading/listening, very good writing/speaking

## Volunteering

Volunteer, Resala Charity Organization | Dec 2020 – May 2021
